

6mm RV8 Series Relays

IDEC 6mm interface relays provide a compact solution for general purpose relay requirements. The RV8H series interface relays are ideal for PLC and electronic systems, industrial automation, panel builders, assembly machine applications and other applications that require a high switching capability in a compact space. The RV relays can be used as universal interfaces between the controller and the actuator to switch small and medium size loads. Installation time is greatly reduced with pre-assembled relays and sockets.

- Space-saving 6mm width
- Only 70mm in height from DIN rail
- Wide input voltage range: 6 to 240V
- RoHS compliant
- Class 1, Div 2 & Class 1, Zone 2 hazardous locations models available
- Screw or spring clamp terminals
- Pre-assembled relay & DIN mount sockets

Replacement relays and sockets are also available. Optional accessories include jumpers, spacers and marking plates to facilitate wiring and quick identifications. Solid State versions are available as well. For additional information, please contact your ECD salesperson.
