

Featured Products

The WAGO 221 series Lever-Nuts® are unique products that help solve the many wiring situations you encounter on a daily basis. Lever-Nuts are compact splicing wire connectors that are reusable and allow direct connection of #24 - 12AWG, solid, stranded or flexible wires. They are UL Listed components rated 600V, 20A.

Features & Benefits

- Fast, easy & safe wiring of all wire types
- Transparent housing allows visual verification of proper wire insertion & strip length
- Two test slots make testing fast & easy
- Connectors are reusable
- Easy connection of smaller gauge wires to larger ones
- Combining wires of different types (solid, stranded or flexible)

Applications

- Traditional electrical installations (junction boxes)
- Lighting Fixtures
- Connecting motor leads
- Control wiring
