A 21st Century Company . . . with 19th Century Craftsmanship

Adjustable Roller Cutter - Easy and Even Cutting

- Saves time, saves labor.
- Gets the right size no matter who cuts.
- Eliminates guesswork and minimizes waste.

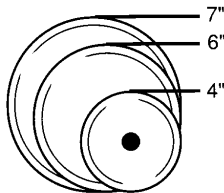

Made for almost every confection. . . you just determine the best time for cutting (ideal batch consistency and ideal batch temperature) and the Adjustable Roller Cutter makes every cut the right cut!

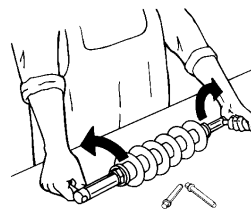

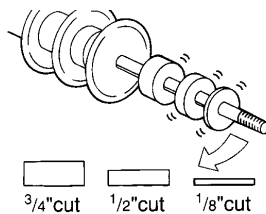

THE ADJUSTABLE ROLLER CUTTER ADAPTS TO YOU:

STANDARD FEATURES

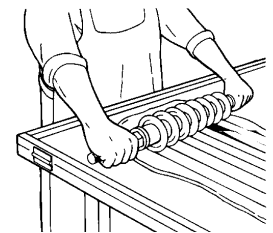

- 1 Interchangeable Food Grade Lexan Spacers
- 2 Stainless Steel Circular Knives with Beveled Edges
- 3 Stainless Steel Revolving Handles and Shaft

Stainless circular knives come in three sizes to accommodate different product heights, i.e. two largest knives cut higher products and the smallest one cuts low products (up to 1/3") *

Easy to use stainless steel guide-wrenches disconnect handles. You rearrange knives and spacers to suit your batch cutting demands.

Instead of having to "guesstimate" you just position the Adjustable Roller Cutter on table or tray to cut the right size.

Let Savage Make the Roller Cutter Which Works Best For You:*

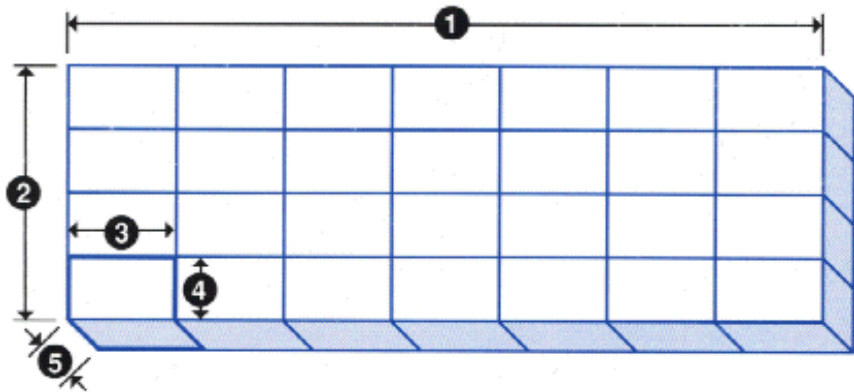

Use this grid to identify your requirements

Measure Batch table/tray:

- (1) Length
- (2) Width

Measure Individual Piece:

- (1) Length
- (2) Width
- (3) Height

Note: Successful cutting requires ample space between top of product and roller cutter spacers. If your product is over 1/3" high, we recommend the 6" diameter knives since spacer takes up part of knife width.

Also Available: "Table" Roller cutter to fit your 30" or 36" wide cooling table. These are made to span the width of your table, riding along the side slab bars for a precise cut. Ask for more information

"Standard" Roller Cutters come with 12 knives, 15 knives, or 20 knives, all with one of each spacer (3/4", 1/2", and 1/8") between each blade.

Want one to use right out of the box? Here's where you tell us what you need.*

SPACE IS PROVIDED FOR SPECIFICATIONS ON THREE TYPES OF CANDY:

	Type 1	Type 2	Type 3
1. Length of batch table/tray:			
2. Width of batch table/tray:			
3. Length of individual piece:			
4. Width of individual piece:			
5. Height of individual piece:
